**Geoscientists in Canadian National Parks
Geologist in Residence Program
Pukaskwa National Park, August 12 – 25, 2024**

APPLICATION DEADLINE EXTENDED TO MAY 31, 2024

The **Geologist-in-Residence** program is delivered in partnership with the **Canadian Federation of Earth Sciences** and **Parks Canada**. It is an opportunity available to an Earth Science Specialist or Communicator, Practicing or Retired Geologist, or Upper-Level Post-Secondary Student studying Geoscience at a Canadian University with knowledge of the geology of the Canadian Shield. Professional Geoscientists (i.e., Pigeon) or Geoscientists in Training (G.I.T.) are encouraged to apply. “The **Geologist-in-Residence**” is a volunteer position. Local travel, food, and accommodation costs incurred by the volunteer are sponsored.

Following two highly successful two-week residencies at Pukaskwa National Park in August of 2022 and 2023, Parks Canada and the CFES have agreed to make the Geologist in Residence a permanent volunteer position at Pukaskwa National Park. We are pleased to accept applications for a Residency opportunity at Pukaskwa National Park for **August 12 to 27, 2024**. Thank you to our partners at the Association of Professional Geologists of Ontario Education Foundation (APGOEF) for supporting volunteer expenses again this year.

The **Geologist-in-Residence** will spend their 2-week on-site residency serving as a Parks Canada volunteer. During this time the volunteer will acquaint themselves with the geological assets of the park, and then educate park visitors and staff about the geological formations and phenomena of the park by delivering programs and presentations.

The role of the **Geologist-in-Residence** is to highlight the significant geological evidence and history on display within the National Park and how that story relates to the wider region. **The Geologist-in-Residence** will serve as a trainer for park Interpretation staff to learn and gain confidence in speaking about geology and geomorphology with the public.

For more information on the goals, objectives and scope of work of the Geologist-in-Residence, please visit the CFES website.

Application Process

To apply for the **Geologist in Residence** Pukaskwa National Park 2024 position, please submit a **Letter of Interest** and a **Curriculum Vitae** to cfes.president@gmail.com, by **May 31, 2024**, Applications will be reviewed

by Canadian Geoscience Education Network (CGEN) Executive. The successful Geologist-in-Residence candidate will be announced in June 2024.
